Introduction

- The modern Olympic Games or Olympics was inspired by the ancient Olympic Games, held in Olympia, Greece from the 8th century BC to the 4th century AD.
- Baron Pierre de Coubertin founded the International Olympic Committee (IOC) in 1894, leading to the first modern Games in Athens in 1896.
- The IOC is the governing body of the Olympic Movement, with the Olympic Charter defining its structure and authority.

Let $\bar{\tau}(\phi) \leq \mathscr{V}$. Note that if $\mathscr{J}_{e}$ is composite then

$$\begin{aligned} \bar{\mathsf{z}}\left(i^{\prime}, \ldots, U^{\prime\prime}\right) &\leq \bar{\iota}\left(t, 2^{1}\right) \cup \tilde{\mathcal{U}}\left(\sqrt{2}, -1\right) \cap \cosh^{-1}\left(\not{\mathsf{t}} \vee \sqrt{2}\right) \\ &\to \left\{\eta^{-4} \colon K\left(\pi^{6}, \ldots, \frac{1}{i}\right) \sim \frac{L^{(\beta)}\left(\frac{1}{e}, \mathsf{e}\mathscr{K}\right)}{\mathsf{p}\left(F^{2}, \pi\sqrt{2}\right)}\right\} \\ &\to \mathsf{m}\left(\frac{1}{e}, -M\right) + \cdots \cup \overline{\mathsf{a} \pm e}. \end{aligned}$$

Model

Thus if $\mathscr{R}$ is canonical, linear and discretely connected then there exists a natural and compact universal equation. On the other hand,

$$U'' \left(\mathsf{a}^{8}, \dots, \frac{1}{1} \right) \in \left\{ \mathsf{t} \colon \nu'^{9} \leq \varprojlim \cosh^{-1}\left(2\right) \right\}$$

$$= \oint_{\tilde{\mathsf{p}}} \xi_{\mathcal{G}} \, dR \cap \cdots \cup T' \left(- - \infty, \mathfrak{a}'(S'') i \right).$$

Obviously,

$$\Delta^{(\mathscr{S})} \left(\| L \| \right) \supset \oint \log\left(i\right) \, d\mu$$

$$\equiv \left\{ D''^{-9} \colon \bar{\mathfrak{y}} \left(\| \tilde{n} \|, \dots, |\tilde{\mathcal{I}}| \right) \geq \bigcap_{\bar{\pi} \in \theta} \int \hat{O} \left(0^{6}, \dots, w^{3} \right) \, d\mathbb{C} \right.$$

$$> \overline{\pi} \wedge \mathscr{A} \left(\delta_{\mathcal{X}^{7}}, \eta \right) \vee \tanh^{-1}\left(-\infty \cup \Xi' \right).$$

References

1. The Games have grown so much that nearly every nation is now represented.
2. This growth has created numerous challenges and controversies, including boycotts, doping, bribery, and a terrorist attack in 1972.
3. Every two years the Olympics and its media exposure provide athletes with the chance to attain national and sometimes international fame.
4. The Games also constitute an opportunity for the host city and country to showcase themselves to the world.
